JACK HEENEY

Digital Product & Growth Manager

PROFESSIONAL SUMMARY

Digital Product, Growth & UX professional with 8+ years of experience leading website platforms, user journeys, digital campaigns, and operational systems across education and technology-focused environments.

Experienced in improving conversion, engagement, and usability through UX-led thinking, analytics, experimentation, and hands-on implementation. Strong background bridging product, marketing, design, and technical teams to deliver scalable digital experiences and business improvements.

Technically hands-on with strong HTML/CSS and web implementation experience, supported by working knowledge of PHP, SQL, JavaScript, APIs, and React. Comfortable managing projects end-to-end, from discovery and UX planning through to launch, optimisation, and ongoing iteration.

EXPERIENCE

Robust IT

Digital Product & Operations Manager

Apr 2019 - Present

- Lead website strategy, landing page optimisation, and digital user experience improvements across training and education platforms.
- Built and managed high-converting landing pages, webinar funnels, mock test systems, and digital campaign assets.
- Collaborate across marketing, support, trainers, sales, and leadership teams to deliver digital improvements and operational systems.
- Improved campaign performance through ongoing testing, analytics, UX refinement, and mobile-first optimisation.
- Managed large-scale email marketing activity, audience segmentation, and webinar conversion journeys.
- Developed internal digital systems and learning tools to improve user engagement, retention, and operational efficiency.
- Supported end-to-end implementation of web features and systems using HTML, CSS, JavaScript, and working knowledge of PHP/SQL.
- Worked closely with business stakeholders to balance technical constraints, user needs, and commercial goals.

★ Key Achievements

- Delivered 300+ landing pages, campaigns, and digital assets across multiple training pathways.
- Helped improve engagement and conversion rates through UX optimisation and performance-led iteration.
- Built scalable mock testing and learner support systems that improved user retention and platform value.
- Contributed to operational process improvements across webinars, CRM workflows, and digital communications.
- Played a key role in maintaining and evolving the company's primary website and digital infrastructure.
- Rebuilt and optimised a 400k+ contact email database over a 4-year period, increasing average open rates from below 2% to consistently above 60%, while improving click-through performance from approximately 0.01–0.10% to 1–2% through segmentation, list hygiene, funnel optimisation, and engagement-focused campaign strategy.

Boxlegal

Junior Designer & Web Developer

Jul 2017 - Jan 2019

- Assisted with website redesigns, responsive layouts, and conversion-focused UI improvements.
- Created marketing assets, graphics, and digital content for multi-channel campaigns.
- Supported website maintenance, updates, and frontend improvements using HTML/CSS.
- Worked alongside marketing and partnership teams to improve brand consistency and digital engagement.
