JACK HEENEY

Digital Product & Growth Manager

PROFESSIONAL SUMMARY

Digital Product, Content & UX professional with 8+ years of experience leading websites, digital platforms, customer journeys and content-driven experiences across technology-focused environments. Experienced in aligning digital content with business goals through UX, SEO, analytics, experimentation and cross-functional collaboration.

Strong background improving discoverability, engagement and conversions through content strategy, user research, marketing automation and continuous optimisation. Comfortable working across Product, Marketing, Sales, Support and technical teams to deliver scalable digital experiences that support commercial objectives.

Technically hands-on with strong HTML/CSS and web implementation experience, supported by working knowledge of PHP, SQL, JavaScript, APIs and React. Experienced managing digital products and content from discovery and planning through to implementation, optimisation and ongoing improvement.

EXPERIENCE

Robust IT

Apr 2019 - Present

Digital Product & Operations Manager

- Led the strategy, development and optimisation of websites, digital platforms, customer journeys and content-driven experiences across training and education products.
- Owned the company's websites, landing pages, webinar funnels, learner platforms, assessment systems and internal digital tools, delivering improvements from discovery through to implementation and continuous optimisation.
- Worked across Product, Marketing, Sales, Support and leadership teams to align digital content, user experience and commercial objectives.
- Improved customer engagement, conversions and search visibility through UX optimisation, technical SEO, analytics, experimentation and performance-led iteration.
- Managed large-scale email marketing, CRM automation, audience segmentation and webinar conversion journeys for a database of over 400,000 contacts.
- Developed scalable internal systems, onboarding journeys and learning platforms that improved operational efficiency, customer experience and learner retention.
- Built responsive websites and digital solutions using HTML, CSS, JavaScript and working knowledge of PHP, SQL, APIs and React.
- Used Google Analytics, Microsoft Clarity, Ahrefs and behavioural insights to measure performance, identify opportunities and guide ongoing optimisation.

★ Key Achievements

- Delivered 300+ landing pages, campaigns and digital assets across multiple training pathways.
- Increased organic website traffic by 25% through technical SEO, UX improvements and continuous optimisation.
- Built scalable learner platforms, mock examination systems and digital support tools that improved engagement, retention and platform value.
- Rebuilt and optimised a 400,000+ contact CRM database, increasing average email open rates from approximately 2% to consistently above 60% through segmentation, list hygiene and automation.
- Generated more than £10,000 in revenue from a standalone digital mock examination product.
- Improved operational efficiency by developing internal systems, automation workflows and digital tools used across multiple business functions.

Boxlegal

Jul 2017 - Jan 2019

Junior Designer & Web Developer

- Assisted with website redesigns, responsive layouts, and conversion-focused UI improvements.
- Created marketing assets, graphics, and digital content for multi-channel campaigns.
- Supported website maintenance, updates, and frontend improvements using HTML/CSS.
- Worked alongside marketing and partnership teams to improve brand consistency and digital engagement.
